PROFILE

Results-driven web developer with a strong foundation in front-end and back-end technologies. Proficient in HTML, CSS, JavaScript, and popular frameworks such as React and Node.js. Proven track record of delivering high-quality, responsive websites and applications that meet client objectives. Adept at collaborating with cross-functional teams to achieve project milestones efficiently. Passionate about staying current with industry trends and continuously enhancing technical skills.

WORK EXPERIENCE

Freelancing - Fiverr | Upwork

2022-Present

- Develop visually appealing and responsive user interfaces using HTML, CSS, and JavaScript, with a focus on optimal user experience.
- Build robust back-end solutions utilizing technologies like Node.js, ensuring efficient data processing and storage.
- Employ frameworks such as React for front-end development, enhancing functionality and streamlining the user interface.
- Collaborate closely with cross-functional teams, including designers, to integrate design elements seamlessly into web applications.
- Conduct rigorous testing and debugging to identify and resolve issues, ensuring the delivery of high-quality, bug-free web applications.
- Stay updated on industry trends, emerging technologies, and best practices to incorporate innovative solutions into projects and maintain a competitive edge.

Freelance Projects

Self Employed

2022 - 2023

- Developed a sleek and responsive static portfolio website using HTML, CSS, and JavaScript.
- Designed and implemented a personal blog site, showcasing articles on various topics, with a static architecture for simplicity.
- Created a static landing page for a small business, providing essential information and contact details.
- Designed and coded a static informational website for a nonprofit organization, focusing on simplicity and accessibility.
- Developed a one-page static website for a local event, featuring event details, schedule, and contact information.
